### Some hints

**Dif** is a monster difficulty. This determines on which dlv and xlv the monster can appear.

Dif must be less or equal than  $(dlv+xlv)/2$ , rounded down.

**Mv** is moving speed. 12 is standard speed, one action per turn.

**MR** is rough percentage of resisting certain magical attacks.

**Resistances** field: SeeInvis is not a resistance even though it is located in the "resistances" field. Rather, it is one of the monster's properties.

#### Conveyed field:

Parentheses in the "Conveyed" field marks the "never leaves a corpse" flag.

This can be somewhat misleading, because e.g. oozes leave globs instead of corpses.

So use this as a hint, not as a strict information.

Stoning and petrification are synonyms.

#### Don't eat field:

ACID corpses damage HP, but stop petrification similarly to lizards.

Eating Riders' (Death, Pestilence and Famine) corpses is instantly FATAL. Should you survive an eating attempt, Riders will rise from the dead. Because of that, gaining teleport control is impossible.

Race marks in the "Don't eat" field indicate races for the purposes of cannibalism. The "Orc" marks are absent, because orcs are natural cannibals. "Aggravate" also doesn't work for cannibals.

*This printable monsters table was made by zHz <<mailto:zHz00@rambler.ru>>, 2022*
